Date:

1. Take photos of 6 garments or props with your phone / camera.
2. Upload those photos to your computer. Take a **screen print** of the directory where you loaded them. Be sure to have the full file name showing with the extension, the date of the file, and the size of the file.
3. Using FastStoneResizer or another software - Resize the photos to a size between 100 and 500 KB. Take another **screen print** of the directory.
4. Why is a neutral colored backdrop helpful for taking photos of costumes or props?

5. Look at the Costume Pieces screen below. Below the photo is a box with the path and file name listed.

The Oaks Youth Theatre

Looking at the names of your photos that you took - how could you rename to make them easier to identify?

Rename the photo files and take a **screen print** of the directory.

6. Look at the photo below. Can you identify what it is? List 3 things that you would do if you were able to re-shoot the picture.

7. This costume has a lot of detail in it. You can include up to 6 photos per garment. What other pictures would you take to show more about this costume?

Answer for question 7:

8. Imagine that you need to photograph a small warehouse full of furniture. How would you set up a photo area to show the furniture best?

Email this completed PDF file and any attachments (i.e. the screen prints) to bte@costumeinventory.com.
